European Journal of Operational Research 50 (1991) 364–365
North-Holland

Contents Volume 50

1 Editorial
A. Mercer, C.B. Tilanus and H.-J. Zimmermann
2 Vendor selection criteria and methods
C.A. Weber, J.R. Current and W.C. Benton
19 A note on the effectiveness of security analysts' forecasts
J.B. Guerard, Jr., B.K. Stone and G. Hansen
22 Deriving route lengths from radial distances: Empirical evidence
C.F.M. Stokx and C.B. Tilanus
27 Production planning
C. Pasche
37 Modeling of an interactive scheduling system in a complex environment
H. Thiriez
48 A goal programming model for bank assets and liabilities management
D. Giokas and M. Vassiloglou
61 Application of the MINORA decision support system to the evaluation of landslide favourability in Greece
I. Hadzinakos, D. Yannacopoulos, C. Faltsetas and K. Ziourkas
76 Perspectives on Operations Research in long-term planning
F.A. Lootsma
85 Databases and desktop publishing in the process of reviewing OR books
K.B. Haley and A.M. Tobias
92 Letter to the Editor, *D.B. Papoulias*
94 Book Reviews, *L.F. Gelders (ed.)*
103 Short Book Reviews, *L.F. Gelders (ed.)*
105 EURO Bulletin, *Ph. van Asbroeck (ed.)*

Feature Issue on Expert Systems and Decision Support Methodology
111 Editorial on Expert Systems and Decision Support Methodology
P.C. Bell and R.M. O'Keefe
113 The impact of language theories on DSS dialog
J.K. Byrer and M.T. Jelassi
127 Human–computer decision systems: The multiple roles of DSS
D. Te'eni and M.J. Ginzberg
140 A decision support system for university admission policies
A.A. Elimam
157 Validation of a model to support the decision to transfer management control systems
C.R. Snodgrass and E.J. Szewczak
166 Network based models for air-traffic control
S.A. Zenios
179 Selecting a text-processing system as a qualitative multiple criteria problem
L. Tanner
188 Improper linear discriminant classifiers
G.J. Koehler
199 Deriving expected values from probabilities of fuzzy subsets
S. Chanas and B. Florkiewicz
211 A relaxation column signature method for assignment problems
K. Paparrizos
220 Conjugate duality and the curse of dimensionality
C.M. Klein and T.L. Morin
229 Research of physical distribution operations
C.B. Tilanus

235 Stochastic modelling of reservoir operations
K. Reznicek and T.C.E. Cheng

0377-2217/91/$03.50 © 1991, Elsevier Science Publishers B.V. (North-Holland)

249 Deterministic fixed order-level inventory models: An application for replenishment of radioactive source material for irradiation sterilizers
R.C. Baker and T.L. Urban
257 Production planning with discounting and stochastic demands
J.L. Higle
266 An integrated plant loading model with economies of scale and scope
M.A. Cohen and S. Moon
280 A comparison of heuristics and relaxations for the Capacitated Plant Location Problem
G. Cornuejols, R. Sridharan and J.M. Thizy
298 Periodic transportation schedules with flexible departure times: An interactive approach based on the periodic event scheduling problem and the deficit function approach
I. Gertsbakh and P. Serafini
310 The finite capacity multi-server queue with inhomogeneous arrival rate and discrete service time distribution – and its application to continuous service time problems
M. Brahimi and D.J. Worthington
325 The practical conversion of linear programmes to network flow models
V.J.D. Baston, M.K. Rahmouni and H.P. Williams
335 A facet generation and relaxation technique applied to an assignment problem with side constraints
R. Aboudi, Å. Hallefjord and K. Jörnsten
345 A cubic algorithm for the directed Eulerian subgraph problem
M.B. Richey and R.G. Parker
353 On pseudolinear functions
T. Rapcsák
361 Erratum
362 OR Software, H. Thiriez (ed.)
364 Contents Volume 50
